(57) Abstract : ANALYSIS AND STUDY OF ASSESSMENT PURPOSES AND METHODS USED BY EFL TEACHERS IN EDUCATION USING DEEP LEARNING ALGORITHMS A method of treating the device has a calculation unit that uses at least one of several utterance intentions in a corpus and an utterance intention in a sequence relationship with the at least one utterance intention to determine the significance of an utterance intention, the similarity between utterance intentions, and the relative distance between utterance intentions. A digital camera with dual aperture zooms that can be used for both still photos and video. The camera has Wide and Tele imaging parts, each with a unique lens/sensor combination, as well as image signal processors, a camera controller, and the Wide and Tele imaging sections are operationally connected to the camera. The New General Service List (NGSL), which is broken up into various divisions based on the number of semesters, is used in the English learning module. Each of the aforementioned units has a multiple-choice test available in the test module. As a teaching strategy that enables pupils to learn a foreign language by placing stickers for the phrases and words essential for the circumstance in the appropriate spots and removing the stickers one at a time after practice is adequate.
